

AutoCAD 2007: One Step at a Time

Review Questions – Lesson 26

07R26

Review Questions

What are the two types of graphic files associated with AutoCAD?

- 1.
 - 2.
 3. An AutoCAD drawing is a _____ image.
 4. & 5. Vector images locate geometry by _____ and _____.
 6. (T or F) The quality of a raster image is affected by screen resolution.
 7. Most non-CAD programs use _____ images.
 8. (T or F) A raster image may be scaled along the X- and Y-axes.
 9. To select an image's frame, set the _____ system variable to **On**.
 10. Use the _____ command to remove parts of an image from display.
 11. Use the _____ command to alter the brightness or contrast of an image.
 12. To speed display time in a drawing with graphics, set the _____ system variable to Draft.
 13. (T or F) You must be sure to reset the previous system variable to High before plotting.
 14. If you set the transparency value of an image to **On**, but it still isn't transparent, what is the likely cause?
 15. Use the _____ command to move one object behind another.
 16. What does OLE mean?
 17. A _____ OLE Object maintains its ties with the OLE Server application.
 18. (T or F) Both Linked and Embedded documents require the server program for editing.
- You can resize an OLE Object using which two frames in the OLE Properties dialog box:
- 19.
 - 20.
 21. By default, the Pastespec command will (link, embed) an OLE Object into your drawing.
 22. The _____ system variable controls the display of an OLE Object both on screen and when plotting.
 23. Use the _____ command to sever a link between an OLE Object and an OLE Server.

24. (T or F) The OLE Server application must be loaded on the computer for an OLE Object to be visible.
25. To send your drawing file with OLE Objects to a client who does not have the OLE Server application, use the _____ button on the Links dialog box to convert the OLE Object to a picture image.
26. Setting the _____ system variable to 1 will load the OLE Server application when you plot the drawing. This will improve plot quality.
27. Typing "im" at the command prompt AutoCAD will present the
 - a) Image Manager
 - b) Image Dialog Box
 - c) Scale frame's text box.
28. (T or F) To insert a photo of the cutting table into the drawing, "iat" may be entered at the command prompt.
29. (T or F) There is no difference between an External Reference dialog box and an Image dialog box.
30. (T or F) Typing Export at the command prompt will call an Export Data dialog box from which Bitmap (*.bmp) can be selected. Using this tool, the user can export a bitmap image of the current drawing.
31. (T or F) The Options button on the Export Data dialog box is available any time it's required.
32. (T or F) It's possible to exchange information with Adobe desktop publishing programs through vector images in the PostScript files.
33. (T or F) To embed an OLE Object, clear the link check box on the Insert Object dialog box.
34. (T or F) In using the Microsoft method to link an OLE spreadsheet into a drawing, the text must be high-lighted, copied to the clipboard, then pasted into the drawing with the Paste Link command.

Answers

1. Raster images
2. Vector images
3. Vector
4. Definition
5. Coordinate
6. T
7. Raster
8. F
9. ImageFrame
10. ImageClip
11. ImageAdjust
12. ImageQuality
13. F
14. The type of image has no transparent value
15. DrawOrder
16. Object Linking and Embedding
17. Linked
18. T
19. Size
20. Scale
21. Embed
22. Olehide
23. Olelinks
24. T
25. Break Link
26. Olestartup
27. a
28. T
29. F
30. T
31. F
32. T
33. T
34. T
